(2) Its failure to allow necessary protective burning to be carried out for fear of perceived and exaggerated smoke hazard in urban areas.

(b) the German Advisory Council on Global Change Report on Climate Projection Strategies for the Twenty-First Century; and

(c) the recent CSIRO and National Oceanic and Atmospheric Administration research,

which show that -

- climate change over the next 20 years could result in a global catastrophe costing millions of lives in wars and natural disasters;
- abrupt climate change could bring the planet to the edge of anarchy as countries develop a nuclear threat to defend and secure dwindling food, water and energy supplies;
- the threat to global stability vastly eclipses that of terrorism;
- a significant drop in the planet's ability to sustain its present population, which will become apparent over the next 20 years;
- deaths from war and famine will run into the millions until the planet's population is reduced by such an extent the earth can cope;
- the WBGU (German Advisory Council on Global Change) should agree that at the appropriate time, they will impose political and economic sanctions upon free rider states; and
- in Australia, the severity of the 2002 drought has been clearly linked to climate change and has led to a forecast 21% decline in gross farm production for 2002-2003.

(2) The Legislative Council therefore asks that the Gallop Government inform the Federal Government that this State recognises the urgent need to reduce greenhouse emissions and to sign the Climate Change Convention and the Kyoto Protocol on Greenhouse Emissions.

   (b) members may ask oral questions of the appropriate minister in the Council and, with the minister's consent but subject nonetheless to SO 331, of any person appearing with that minister.

6. The Estimates Committee is not to require the attendance of a person by name or office unless the person is authorized or required by law to perform a function with a public purpose and there is no capacity for a minister -
