

LESCHENAULT ESTUARY GROYPNE

**292. Hon SALLY TALBOT to the minister representing the Minister for Environment:**

- (1) Is the Minister for Environment aware of any threats of flooding or erosion or other damage risks associated with the extent of damage to the groyne that has been washed away near the convergence of Collie, Brunswick and Preston Rivers in the Leschenault Estuary?
- (2) Is restoration work required to restore the groyne and the area around The Cut before winter to prevent flooding and further damage?

**Hon HELEN MORTON replied:**

I thank the member for some notice of this question.

- (1)–(2) The Minister for Environment is aware of this issue. It has previously been raised by the member for Bunbury. The Minister for Transport, through the Department of Transport, is the minister responsible for this issue.
