

INFRASTRUCTURE PROJECTS — CONTAMINATION MANAGEMENT

1085. Mr C.J. Tallentire to the Minister for Environment:

I refer to both the Elizabeth Quay and the Perth stadium project at Burswood and ask:

- (a) are these projects being monitored by a Contaminated Sites Auditor accredited by the Department of Environment and Conservation; and
- (b) if so, has a Contaminated Sites Auditor had to stop work on-site because the environment or sensitive receptors, such as the Swan River, were at risk and if so:
 - (i) on which dates was worked stopped and for how long;
 - (ii) for what reason was work stopped on each of these occasions; and
 - (iii) has the Contaminated Sites Auditor produced a report on these incidents and, if so, will the Minister please table it?

Mr A.P. Jacob replied:

- (a) Yes. Both sites are monitored by an Accredited Contaminated Sites Auditor.
- (b) I have been advised that the works have not been stopped by the Contaminated Sites Auditor.
