

PERTH STADIUM — CONSTRUCTION — ASBESTOS

752. Hon KATE DOUST to the parliamentary secretary representing the Minister for Sport and Recreation:

I refer to answers given to question 970 on 16 September 2014 and question 1301 on 25 November 2014. Can the minister guarantee that no asbestos products or materials have been or are located on the new Perth Stadium construction site?

Hon COL HOLT replied:

I thank the member for some notice of the question.

No product containing asbestos has been used as part of the construction of Perth Stadium. All materials imported from overseas for use in the construction of Perth Stadium have been independently tested and no asbestos has been identified. In conjunction with the construction contractor Brookfield Multiplex, the state project team will continue to monitor all construction materials supplied, including samples, and ensure independent testing is undertaken.
