

TAFE — ASSET INVESTMENT PROGRAM

2191. Mrs L.M. Harvey to the minister representing the Minister for Education and Training:

Given that the total cost of the TAFE colleges' asset investment program was \$97.6 million last year and now has a total estimated cost of \$93.4 million, can the Minister please explain the variance and what has led to the loss of \$4.2 million?

Mr P. Papalia replied:

The variance is largely a result of completed projects which are not reflected in the 2017–18 asset investment program, partially offset by additional funding.
