

MANGLES BAY CANAL ESTATE AND MARINA

203. Hon LYNN MacLAREN to the minister representing the Minister for Water:

I refer to the proposed Mangles Bay canal estate and marina.

- (1) What are the estimated costs of realigning the Sepia Depression ocean outflow line and the Lake Richmond overflow drain?
- (2) What is the route of the proposed realignment of the Lake Richmond drain, including the location of its endpoint?
- (3) Have the proponents requested that the Water Corporation contribute to the cost of realigning the SDOOL and/or the Lake Richmond overflow drain?
- (4) If yes to (3), what elements of each project have they proposed the Water Corporation pay for, and what is the cost?

Hon KEN BASTON replied:

I thank the member for some notice of this question, which I answer on behalf of the Minister for Water.

- (1) In July 2013, the proponents estimated that the deviation costs of all Water Corporation assets for this project, including the SDOOL and the Lake Richmond overflow drain, will be \$16.5 million. The Water Corporation does not have the current estimate.
- (2) I table the attached document.
[See paper 3903.]
- (3) Yes; this was part of early planning considerations.
- (4) The Water Corporation has not made a financial contribution towards this project.
