

EELUP ROUNDABOUT, BUNBURY

34. Hon ADELE FARINA to the minister representing the Minister for Transport:

I refer to the Eelup roundabout in Bunbury.

- (1) Has traffic modelling on the impact of stage 1, Bunbury outer ring-road, and stage 2, port access road, on traffic patterns at the Eelup roundabout been finalised?
- (2) If yes to (1), will the minister table the traffic modelling; and, if no to (1), when will the traffic modelling be finalised?
- (3) Has Main Roads finalised the concept design options for the stage 1 Eelup roundabout works, being the reduction of the size of the roundabout?
- (4) If no to (3), why not, and when will the concept designs be finalised; and, if yes to (3), will the minister table the concept designs?
- (5) What is the commencement date and the completion date for the construction works on Eelup roundabout stage 1?

Hon SIMON O'BRIEN replied:

I thank the member for some notice of this question. Main Roads WA advises, through the Minister for Transport —

- (1) Yes. Traffic modelling has been carried out.
- (2) Not at this stage. The modelling is still in a raw data state and needs to be put into a format that can be analysed. This is currently being undertaken.
- (3) Main Roads has developed options to improve the roundabout until the flyover is built. There is a need to ensure that the first stage works fit in with the ultimate flyover. The first stage options will be presented to the minister for consideration in the near future.
- (4) Not applicable.
- (5) Works on the first stage will commence this year and be completed by mid next year.
