

BUSINESS OF THE HOUSE

Order of the Day 1 — Motion

HON SIMON O'BRIEN (South Metropolitan — Minister for Transport) [8.34 pm]: I move —

That order of the day 1 be now taken.

By way of brief explanation to the house, the question contained in order of the day 1 has to be put at this day's sitting. The government is moving to bring on the disallowance motion in relation to the Genetically Modified Crops Free Areas Exemption Order. The government is seeking to bring this matter on now, if that is the will of the house, so that we can have some debate before we get to the stage at 9.45 pm when the question has to be put. Obviously, all the rules for time allowed for debate apply as normal. However, speakers might want to bear in mind, when making their contributions, the importance of this to a number of members and the fact that a number of members might want to contribute.

Question put and passed.
