

**SCHOOLS — SAFE SCHOOLS PROGRAM**

2065. Hon Nick Goiran to the Minister for Education and Training:

I refer to the Government's commitment to provide funding to allow public secondary schools to choose to use the Safe Schools program that meets their school's needs, and I ask:

- (a) has the Western Australian School Curriculum and Standards Authority developed syllabuses that provide information at each year level to support teachers to plan and develop health education learning and teaching experiences;
- (b) if yes to (a), will you table the documents recording those developed syllabuses;
- (c) are schools encouraged to access evidence based resources and programme to help promote respectful and positive relationships;
- (d) further to (c), do schools have the flexibility to choose resources that suit the context of their teaching and learning programs; and
- (e) further to (c) and (d), what is the list of evidence based resources that schools are recommended to choose from?

**Hon Sue Ellery replied:**

- (a) Yes.
- (b) Yes. [See tabled paper no 2686.]
- (c) Schools are expected to consider the evidence base behind all resources they choose to use to support the implementation of the Health education curriculum.
- (d) Yes.
- (e) There is no endorsed list of evidence-based health education resources for schools.
