

PUBLIC AND COMMUNITY HOUSING — ENERGY EFFICIENCY

7512. Mr C.J. Tallentire to the Minister for Housing

What has the State Government done to improve the overall energy efficiency of our public and community housing since July 2011?

Mr T.R. BUSWELL replied:

The Department of Housing advises:

In newly constructed properties, the Department incorporates the requirements of the Building Code of Australia.

In existing properties, the Department, in partnership with the Public Utilities Office, has commenced projects to improve the energy efficiency of public housing; the provision of efficient water heating and installation of ceiling insulation.
