

FOREST PRODUCTS COMMISSION — HARVEST OPERATIONS

2001. Mr C.J. Tallentire to the Minister for Environment:

With regard to the Conservation Commission, I ask:

- (a) has the Forest Products Commission been operating in the absence of finalised operational logging planning guidance material; and
- (b) if yes to (a), what is the Commission proposing to do to rectify this situation in the new Forest Management Plan 2014–2023?

Mr A.P. Jacob replied:

- (a)–(b) The Forest Products Commission carries out timber harvesting operations in accordance with requirements of the approved forest management plan and relevant guidance documents. The Forest Management Plan 2014–2023 requires some of these guidance documents to be either revised or developed.
