

MAIN ROADS — TRAFFIC ACCIDENT DATABASE

1092. Hon ED DERMER to the minister representing the Minister for Transport:

Some notice has been given of the question.

Throughout Western Australia, for each of the calendar years 2008, 2009 and 2010 —

- (1) How many traffic accidents have occurred in which a motor vehicle turning with a green light or arrow on an intersection controlled by traffic lights has collided with a pedestrian or pedestrians?
- (2) How many, if any, such collisions have resulted in people receiving hospital attention?
- (3) How many, if any, such collisions have resulted in a fatality or fatalities?

Hon SIMON O'BRIEN replied:

I thank the honourable member for some notice of this question. The Minister for Transport has asked me to give the house this response —

- (1)–(3) The data stored in the Main Roads crash database is unable to determine whether a motor vehicle was turning with a green light or arrow.
