

PUBLIC TRANSPORT — RAIL SYSTEM EXPANSION COST

4955. Hon Ken Travers to the Minister for Finance representing the Minister for Transport

I refer to the estimated cost of \$1.2 billion for rail system expansion in the document 'Public Transport For Perth in 2031', and ask —

- (1) On what basis was this figure determined?
- (2) Which extensions are included in this figure?
- (3) What works are included for each extension?
- (4) How many kilometres of rail are included in this figure?
- (5) How many new stations are included?
- (6) What are the location and cost of the new stations included in this figure?

Hon SIMON O'BRIEN replied:

The Department of Transport advises:

- (1)–(2) This figure is an estimate of the investment required to develop the rail system expansion projects identified in the 'Public Transport for Perth in 2031' plan, which has been publically available since July this year on the Department of Transport website ([www.transport.wa.gov.au](http://www.transport.wa.gov.au)).
- (3) Typical rail network construction works are included, such as track work.
- (4)–(5) Refer to part (1)–(2).
- (6) Individual station costs are subject to further project planning.
