

TRANSPERTH BUSES — ANTISOCIAL BEHAVIOUR

**62. Hon KEN TRAVERS to the minister representing the Minister for Transport:**

- (1) Will the minister table a copy of the full analysis by Transperth of incidents over the past two years referred to on page 4 of *The West Australian* on 17 February 2011?
- (2) Will the minister table a summary of the statistics for all antisocial behaviour that occurred on the Transperth system for the same periods as the above analysis covered?
- (3) If no to (1) and (2), why not?

**Hon SIMON O'BRIEN replied:**

I thank the member for some notice of this question.

- (1) I refer to the figures released in *The West Australian* of 17 February 2011. The Public Transport Authority advises that the comparison periods for the 17 per cent decrease in bus driver assaults over the past two financial years are 7 September 2008 to 30 June 2009 and 7 September 2009 to 30 June 2010. These periods reflect the introduction of new security initiatives undertaken by the PTA. The PTA advises that the comparison periods for the 25 per cent decrease in rock and projectile incidents over the past two financial years are 7 September 2008 to 30 June 2009 and 7 September 2009 to 30 June 2010. These periods reflect the introduction of new security initiatives undertaken by the PTA. The data on the 37 per cent decrease in damages on trains is still being extracted and collated. Please refer to Legislative Council question on notice 2782 for data on the 23 per cent decrease in offensive behaviour and 27 per cent decrease in violent behaviour.
- (2) Please refer to Legislative Council question on notice 2782.
- (3) Not applicable.
