

CONTAMINATED SITES — EXMOUTH

438. Hon KEN BASTON to the Minister for Environment:

- (1) Can the minister confirm how many registered contaminated sites exist within one kilometre of the intersection of Nimitz and Huston Streets in Exmouth?
- (2) Of these, how many are considered to be remediated?

Hon STEPHEN DAWSON replied:

I thank the honourable member for some notice of the question. The following information has been provided to me by the Department of Water and Environmental Regulation.

- (1) Five separate contaminated sites are recorded under the Contaminated Sites Act 2003 within one kilometre of the intersection of Nimitz and Huston Streets in Exmouth. These are —
 - (a) a former depot;
 - (b) an asbestos-contaminated site;
 - (c) a former power station;
 - (d) an operational service station; and
 - (e) a former service station.

Some of these sites comprise more than one lot or land parcel.

- (2) Three sites are currently remediated or partially remediated —
 - (a) the former depot, which is now classified as decontaminated;
 - (b) the asbestos-contaminated site is now partially remediated for restricted use; and
 - (c) the former power station is now partially remediated for restricted use.
