

BAYSWATER TRAIN STATION

1284. Hon Dr BRIAN WALKER to the Leader of the House representing the Minister for Transport:

I refer the minister to the government's Building for Tomorrow website, which contains basic details regarding the ongoing upgrade of Bayswater station, including an intimation that the Midland line will be closed at some stage in early 2023 to allow for the realignment to the new, and hopefully collision-free, bridge.

- (1) Is this project currently running both on schedule and on budget?
- (2) Given that early 2023 is fast approaching, can the minister confirm the expected closure dates necessary to accommodate the realignment?

Hon SUE ELLERY replied:

- (1)–(2) The closure dates are being finalised with the contractor and Transperth operations to find the best time to minimise impacts to the community and passengers.
