

STANLEY ROAD WASTE MANAGEMENT FACILITY

**880. Hon Dr STEVE THOMAS to the minister representing the Minister for Environment:**

I refer to the Stanley Road Waste Management Facility operated by the Bunbury Harvey Regional Council.

- (1) Is this facility currently being used for landfill of waste; and, if not, when did this cease?
- (2) If no to (1), where is the waste going now and how is it being managed?
- (3) Are general waste and recyclable materials being separated as part of any new management system?
- (4) If yes to (3), what percentage of the waste is being recycled?

**Hon STEPHEN DAWSON replied:**

I thank the Leader of the Opposition for some notice of the question. This information is current as at 20 September.

- (1) No. Landfilling ceased on 25 March 2022.
- (2) I understand that residual municipal waste is still received at the Stanley Road Waste Management Facility and transferred to the Banksia Road Waste Management Facility in Dardanup for burial.
- (3) The City of Bunbury and the Shire of Harvey provide a three-bin waste service to their ratepayers, including a commingled recycling bin. Recyclable waste is taken to a materials recycling facility in Bibra Lake. I am not aware of a new management system for recyclables at the Stanley Road Waste Management Facility.
- (4) It is 65 to 70 per cent, based on the Bunbury Harvey Regional Council's waste data submission for 2021–22.
