

HEALTH — GENDER DIVERSITY

1938. Hon Ben Dawkins to the parliamentary secretary to the Minister for Health:

I refer to the concept of biological sex in medicine, and I ask, noting that even after transition surgery, a blood test will show that a biological male is a male due to chromosomes, can the Minister tell us if it is possible for a biological male to become a biological female?

**Hon Pierre Yang replied:**

It is not apparent how this question relates to public affairs with which I am connected as Minister.
