

COLLIE TRANSITION PACKAGE

692. Hon Dr STEVE THOMAS to the minister representing the Treasurer:

I refer to my question without notice 608 of 13 June 2023 referencing the decade-long, job-creating Collie transition package totalling \$547 million and the allocation of \$300 million of this fund to the decommissioning of the Collie power station and Muja D units following their closures in 2027 and 2029.

- (1) What is the projected full-time and part-time employment figure associated with the decommission of Collie power station and Muja D units at the onset, after one year of decommission commencement, five years of decommission commencement and 10 years of decommission commencement?
- (2) What will be the scope of the local jobs at the onset of decommission, after one year of decommission, five years of decommission and 10 years of decommission?
- (3) How will this local job creation matrix be qualified and quantified as long-term sustainable employment vectors in determining the accuracy of local job creation numbers?

Hon STEPHEN DAWSON replied:

I thank the Leader of the Opposition for some notice of the question. The following answer has been provided on behalf of Treasurer.

- (1)–(3) Detailed planning for the decommissioning of Collie power station and the Muja D units, including staging and timing, and job outcomes, is still ongoing.
