

STANDING COMMITTEE ON ESTIMATES AND FINANCIAL OPERATIONS

Session One, Wednesday, 23 June 2021

Questions on Notice

No.	Question	Page
1	Provide monthly ambulance ramping figures per facility, for 2017, 2018, 2019, 2020 to date?	2-8
2	Provide bed capacity per facility from 2017 to today, including bed types for 2021.	9-12
3	Provide the email trail discussing/escalating concerns regarding WA Police requests for SafeWA data	13
4	When did the Director General first discuss the WA Police request for SafeWA data with the Chief Health Officer	14
5	Provide a breakdown of how each medical specialty college recruits and whether any have regional targets.	15
6	Provide average numbers presenting to emergency department by month, from 2017 to current.	16-21
7	Provide a progress update on the two recommendations from the General Computer Control (GCC) Management Letter to Health Support Services (report 83)	22

Question 1

Transfer of care (TOC) is a supporting metric which aims to ensure that at least 90% of patients arriving to emergency departments via ambulance are transferred to the care of hospital staff within 30 minutes of arrival.

Ambulance ramping is a St John Ambulance performance metric and is reported publicly on their website.

Transfer of Care (TOC)% and Extended TOC minutes (over 30mins) by site, by month for the years January 2017- June 2021

Question 2

Metropolitan bed capacity by site and type.

Please note: what is admitted to a bed is based on purchased activity and demand (rather than physical beds). Similar hospitals may utilise 'similar' bed types such as medical/surgical and rehabilitation for different patients in response to demand, or changes in service delivery models (multi day medical/surgical to same day activity). As such, bed numbers are open to interpretation at the time the survey is conducted.

Note:

- Beds do not include any contracted capacity at private hospitals. It does include capacity and privately managed public hospitals i.e. Joondalup Health Campus, St John of God Midland Public Hospital and Peel Health Campus.
- Beds are surveyed at a particular point in time and there can be significant variance as sites respond to changing demand management requirements.
- Bed types are shown to demonstrate that there are a different bed types to accommodate varying patient requirements.
- 2020/21 figures are based on modelling data. The System Manager has planned a physical bed survey in 2021.

Question 3

Note the email dated 22 February 2021 at 9.14am erroneously includes a reference to the COVIDSafe app instead of the SafeWA app.

On 22 Feb 2021, at 9:14 am, Williamson, James [REDACTED] wrote:

[REDACTED]

When I was covering for you I (verbally) raised the issue of police access to the COVIDSafe app information (eg raceway shooting) with [REDACTED] and his colleague who attends the Premier's meetings. There seems to be minimal judicial oversight of such requests and I think 2-3 were made in connection with that incident. I have repeatedly called this out as a cause for concern which could threaten public trust. I just became aware of a similar situation in Singapore:

Delivering a Healthy WA

The information contained in this email is confidential and is not for distribution without the author's prior consent.

Question 4

The earliest written documentation between the Chief Health Officer and the Acting Director General regarding the WA Police request for access to SafeWA data was 8 January 2021.

Question 5

How each medical specialty college recruits

Individual medical specialty colleges are training providers and do not recruit a specialist workforce. Junior doctors can apply to specialty medical colleges once they have enough clinical experience (i.e. at least 1 or 2 years after successfully completing medical school) and have successfully applied for a training position. Potential trainees need to meet the requirements for entry to training with the relevant specialty medical college (evidence of clinical experience and supervisor reports etc) and pay a fee to join the college.

Do medical specialty colleges have any regional targets

As stated, medical specialty colleges are training providers and do not recruit. Speciality colleges can train as many trainees as there are accredited training positions. Capacity to train is limited by the availability of supervisors and guidelines set by each specialty college – i.e. exposure to adequate case numbers/supervising specialist workforce within guidelines set by the speciality. Hospitals may elect to recruit to accredited staff levels without the speciality college being involved as this is outside their remit as a training provider.

Question 6

Emergency Department Attendances by site, by month for the years January 2017- June 2021 (WEAT sites only - metropolitan and major regional)

Question 7

Health Support Services has completed all actions relating to the two significant Office of the Auditor General Information Systems Audit Report 2019 findings in November 2021. These two issues related to Remote Access and Network Security at HSS.
