Ms Samantha Perk
Committee Clerk
Standing Committee on Estimates and Financial Operations
Parliament House
PERTH WA 6000

18 November 2013

Dear Ms Perk

Thank you for your letter dated 11 November 2013 regarding 2012/13 Agency Annual Report Hearing – Transcript of Evidence.

Having read the transcript, I have identified two matters that are incorrect factual information.

These matters are:

- The study area for the climate change foreshore vulnerability project the Swan River Trust undertook did not extend to the Kent Street Weir on the Canning River. The project area actually extended to Riverton Bridge on the Canning River.
- The River Guardians and Dolphin Watch programs did not begin in 2009 and 2011 respectively. These programs actually began in 2008 and 2009.

Thank you for the opportunity to correct this information and I do apologise that this information wasn't correctly provided to the Committee at the time of the Trust's hearing.

Please find enclosed a corrected and signed transcript.

Yours sincerely

Mark Cugley
A/General Manager
