

Elective Surgery (Reportable) Wait List cases that were Cancelled (Deferrals and Reschedules), for hospital and patient initiated reasons

Note - Cancellation numbers can be impacted by a number of factors, including an amendment in booking practices, a reshuffle or reconfiguration of a ward, speciality lists transferred between sites as well as a transition from one patient administration system to another.

Notes: - This data has the potential to identify individuals so should be treated confidentially:
only to be used to meet the requirements of this request and not published or passed onto any third parties:
not joined with any other data that could potentially re-identify individuals.
- Urgency category 1 cases are over boundary if the patient has waited more than 30 days.
- Urgency category 2 cases are over boundary if the patient has waited more than 90 days.
- Urgency category 3 cases are over boundary if the patient has waited more than 365 days.
- Elective Surgery Wait List reportable (surgical) cases from July 2021 as per the reference document ESWLDC Commonwealth Non-Reportable Procedures
http://wsfm004app:8085/PAQ_Reports/Waitlist/Health/reference_documents.aspx
This definition determines the Non-Reportable procedures, all other procedures are considered to be reportable (surgical).
- As per standard reporting, only patients ready for care are included.
- WA Public hospitals only, does not include data from Contracted Health Entities.
- Cancellation records are generated when patients scheduled admission date is removed (deferrals) or changed or (reschedules).
- From 2012 to September 2018 hospitals changed patient administration system (PAS) to webPAS.
Most WACHS hospitals were on the HCARE PAS that did not generate cancellation reports. By the end of 2016-17 all WACHS hospitals had moved across to webPAS.
In early 2018-19 the last Perth Metro hospitals (SCGH & OPH) changed PAS from TOPAS to webPAS. They both had increases in the months following this transition.
