To Ms Linda Omar

I am writing in regards to cockburn cement plant in Munster . I am a resident in bay view estate Yangebup with a young family, On most evenings smoke from the plant drifts over our area it has a unpleasant smell dust from the plant has to cleaned from out door areas glass tables etc on a daily bases. This dust cannot be good for anyone's health especially our new born child. I also noticed this same smell at Yangebup primary school the other day when picking up one of our children . Something needs to be done as soon as possible.

Regards Ian Ridley
