Subject: Cannabis legalisation and law reform

Hi to whom it may regard/concern I am writing in regards to the legalisation of cannabis .As a ex user (stopped due to work) i can say the impact of cannabis was minimal ,compared to alcohol(i would come home from work have a shower and feed and chill out with the family go to the park or chuck on some PlayStation or movies) .Now those who drink that I know of ,waste there nights away from their family's, end up in fights or some disorderly, come to work feeling like crap. When I was smoking I never did before or at work but I can say I would wake up feeling million times better then my mate joe who drank would.thats just some social and ethirical examples when we get down to the science and medical side of cannabis we can see the positive and intresting facts scaterd throughout the internet and news. From notable organisation like the W.H.O to independent governments around the world such as Cannada,Uruguay and Portugal .0.00 deaths from cannabis use ,medical bennifits from both cbd and thc as well as others compounds with pro effects . Relative info .<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3736954/> The economics and law side of things is far more complex but I can say from evidence as seen in the U.S and Portugal a booming economy, more jobs ,more tourism ,a boost in the real estate sector plus less crime ,no more full prisons ,and all tax revenue nationally and abroad could bring billions in to Australia .Don't you want our country to thrive and take lead in our global markets like the U.S .the big sponsors can't win, we as the people of AUSTRALIA will fight for what's right national news polls ,show the numbers !!! wheres the Referendum !!! ,Same sex got one we the people should decide . Thank you for your time P.S (sorry about my grammar)

Select Committee into Alternate Approaches to Reducing Illicit Drug Use
