To The Standing Committee
 On Environment and Public Affairs
 Inquiry into Cockburn Cement Ltd Munster.

27-10-2010.

Myself and my wife live in Beelieu outside of the industrial buffer zone. Our house, car and outside effects have been covered by dust from the cement works from time to time. We have concerns for health effects as I have had blood noses and the wife suffering itchy, watery eyes due to the lime dust. We are extremely baffled by the advent that this company continues to have industrial fallout, invading our living space without being shutdown or made to fix the problem before continuing to operate. Having previously resided in Hope Valley which is now latitude 32 where we had a government caveat placed on our house and land and told of resumption because of industrial pollution causing health problems. Being forced to relocate to allow industry to have a zone for light heavy and obnoxious industries to operate within the buffer zone which forced our relocation. It appears now that was a waste of time as Cockburn Cement is allowed to pollute areas outside of that buffer zone area of which they are in. Apparently there are two sets of rules one for them and one for us. This is extremely disappointing for us as we were forced to give up a great life style to accommodate the government wish for industry. However the government still allows industry to invade our space again. ~~As~~ I will appear before the committee if you wish.

Thank you.
 B H Hall.
