

To the Chair & Committee Members

I am a law abiding citizen & have never been questioned or refused any firearms I have purchased.

Recently my firearms were stolen, after conforming with legislation regarding handling & storage.

I feel the theft is not a problem relating to firearm owners but a societal problem, I feel the police partially blame me for this theft & have done very little in respect to extracting information from the offenders in relation to the recovery of my firearms.

I am now purchasing new replacement firearms & have to re licence at exorbitant fees with nonsensical background checks done many times on previous occasions.

Regards

J. A. Gill
