

We are a family of five with both parents working. We live in a semi-rural area and was told we are not eligible for the bus service. Public transport does not extend to our residential area. My children are too young or unable to ride to school. This would involve an hour long cycle along the high way with traffic, including many trucks travelling at 110 km/hr. Not a practical or safe option! The school has therefore had to provide a bus service at a cost to the school.
