To: Select Committee into Alternate Approaches to Reducing Illicit Drug Use
Subject: Legalisation of Cannabis & revue of illicit drugs.

Dear Council

I do hope you all take this opportunity to catch up with the modern world.

Firstly Cannabis, it should have full legalisation and regulation in exactly the same way as Alcohol. It is safer, huge amounts of studies from Canada, the USA & Israel scientific communities have already proven this.

It has less harm, no violence and is proven to help in so many ways!
By regulating and taxing, you as a government would make MILLIONS that can then be reinvested into Health & Education!

Look at the revenue made in the US States alone!

Uruguay has been a huge success already!

Secondly, illicit drug use.

You know prohibition doesn't work.

The stat's are clear in the amount of people, especially young people, that are trying and partaking in these need to be safe from it if there is a risk.

Illegality just brings more danger to something a lot of people already access.

It would do huge amounts to minimise the issue with meth/ice especially.

It should be about harm reduction, education and understanding.

Again look to Portugal.

They have had DECLINES in all illicit drug use since decriminalisation.

Stop treating the public like children who can't make thier own decisions, or that have done the research like myself.

Please be intelligent and forward thinking.

Know that you can do so much to help the state and country by allowing the full legalisation and regulation of the Cannabis market and decriminalisation of other illicit drugs to better the education and treat it as a health issue as it always shouldve been!

Thank you for your time.

Please, I implore you, let our modern country and state join the modern world.
