The WA Legislative Council's Standing Committee Inquiry into Property Rights

Dear Committee,

I wish to convey to you all that I fully support the full submissions by the:

- WA Fishing Industry Council
- Western Rock Lobster Council
- Fishing Families WA

Additionally with respect to Reference Item (c) recognises the property right of government-issued licences and authorities including commercial fishing.

The recent events in the Western Rock Lobster industry highlight the need for property security for fishing license holders through legislated property rights.

My business, family and the relationship with my finance provider was put under grievous stress by the events caused by a rogue minister acting arbitrarily and without determination of affects and consequences.

If our annual licences and quota units were treated equally as terrestrial property, this would not have occurred.

Regards Roger King
