Subject: Fracking submission complaint

I had just learnt of the fracking policy proposed from a wilderness society rep. I know of the devastating effects of fracking on the Midwest in USA and is terrifying to learn that it was being considered that this would happen in my own state and I was unaware. This is public land and the public need to be more involved in the decision making process. This issue needs to be unbiasedly presented in the media so people are aware of what is going on.
The Kimberly is our states jewel you can't ruin it with out the people putting up a fight.

Yours sincerely
