**Subject:** Recreation Activities within Public Drinking Water Source Areas

To whom it concern,

My view on this matter is that all drinking water sources need to be protected and not used for any recreational purposes at all. Water is our most precious resource which needs to full protection and management required to maintain a safe level of water quality.

My opinion is if recreation activities are required in existing areas, it should only be in dams or water sources used for irrigation purposes.

Regards

**Tony Fioraso**
