Subject: access to freshwater dams in the southwest

Hello ,simply put the eastern states allow rec fishing in their dams etc and seem to manage fine so why does the Watercorp seem so anti recreational fishing ?there are alot of opportunities going begging here and there is some very big trout in Canning dam Watercorp deems its ok to have sewerage overflow escape into the Swan river but God forbid a kayaker or fisherman even put a foot in the water of a dam ?seems very hypocritical.

thanks
Brian Stewart
