Subject: Human Reproductive Technology and Surrogacy Legislation Amendment Bill 2018

Dear Esteemed Members,

I am voicing my concern about the proposed Human Reproductive Technology and Surrogacy Legislation Amendment Bill of 2018 which would enable male same-sex couples and single men access to surrogacy. PLEASE VOTE NO for the sake of future generations. ALL children should be entitled to having a mother and a father. Evidence in some countries that have permitted this is not good and they are reversing their decision. Why go there? The cost on all levels is HUGE!!! We will be opening in a way Pandora's box.

I have deliberately written briefly as I can only imagine how much reading material you must go through.

Thank you for taking the time to read my email. Have a great day!

Warmest Regards,

Jenny Troy
