

Dear sir

I have just applied for an additional firearm. Government like all have increases in costs but an increase of almost \$100 is really over and above the cost of living index .

The firearm applications cost has increased from \$28 to the new \$169.50 after the change to using the post office . This change has not been to successful as it does not have a face to face contact. The local police had a part in the issue and could help the firearm applicants.
