

PUBLIC

19TH October, 2010

Ms Linda Omar
Committee Clerk
Standing Committee on Environment and Public Affairs
Legislative Council
Parliament House
PERTH WA 6000

I am writing to express my views about how the company Cockburn Cement is address the emissions. Something needs to be done and done NOW, NOT in 2 years time. I live and work near Cockburn and really I would like to see this operating so health issues are the number 1 priority, and not money.

So many things happening are all about money!!!!!! It's about time that we the public come first and you as the people that were voted and paid for by us the public, so how about you start listening to us and supporting us for a change.

It's just NOT good enough that we don't have your support in the first place. The odors and the dust make it hard to breath sometimes, and also the pollution in the air etc, there will be consequences, but to what degree and really does anybody care about the people and what it's doing to everyone.

It's about time that reviews are taken as to the process of issuing and amending licenses to them and how they operate and the quality of the air in and around the Cockburn, Henderson and surrounding suburbs.

I want to see things change and that it's for our benefit and not for profit or any other reason.

Mrs. Julie Sapienza
