

do when it may concern,
 With regards to
 your letter about the "Rockliffe Bement in
 emissions problem, you asked us to state
 how it affected us in our daily life.
 We find the dust in particular
 the biggest problem around our house,
 since moving in five (5) years ago it
 has a constant problem all day every day
 from window sills to our furniture
 gets covered in the fine dust, we can't
 even open our windows for fresh air it
 gets into the house and covers everything
 from floors to furniture in a fine dust,
 when it gets really windy it gets stuck
 back together into clumps in and around
 our affects area, I am for more sweeping
 up.
 As you state in your letter to us

MR & MRS AD STRUTTERS

(2)

the odours are unacceptable, can be very overpowering.

We do hope you are able to do something about these issues, when you have to live with them day in day out it can really get to you.

Yours Sincerely

M. Stutter
