

My son was born 8 weeks premature in paraburdoo and needed to be in an incubator straight away, the St John ambulance volunteers where on hand waiting to transport my son and wife directly to the airport from the hospital where RFDS was waiting to fly them to Perth so he could receive the care he needed. Without those wonderful st John volunteers he would not of been able to be transported to the airport and what a lovely, friendly, helpful bunch of people that volunteer their spare time to help others in need, it goes along way especially in the remote pilbara town we live in
