Dear Sir,

Re: Inquiry into the Implications for Western Australia of Hydraulic Fracturing for Unconventional Gas

I write with respect to the call for submissions to the Inquiry on Hydraulic Fracturing. Buru Energy has had input to and endorses the Australian Petroleum Production and Exploration Association (APPEA) and Chamber of Minerals and Energy (CME) respective submissions to the Inquiry.

However, as a leading explorer for both conventional and unconventional resources in Western Australia, I am also writing to offer our Company's assistance during the course of the Inquiry in providing details of our activities and more general information on tight gas exploration and production involving the use of hydraulic stimulation of tight reservoirs.

This could include a presentation to the Committee, and an opportunity for the Committee to visit our activities if this was felt appropriate. Please contact myself or Dr Keiran Wulff, the Company's Managing Director in this regard.

Yours sincerely

Eric Streitberg
Executive Director
Buru Energy Limited
