

We had to call an ambulance to our home on 23rd April 2021 as I was having what I suspected to be a stroke. St Johns responded extremely quickly & kept my wife on the phone for her to follow instructions to ascertain my severity of the suspected stroke. The ambulance arrived very quickly & proceeded to examine me, then I was transferred by ambulance immediately to St John of God Hospital in Midland. I am extremely grateful to them for their prompt attention as I have been very fortunate to have not sustained disability.
