

“ dear committee members. I was genuinely surprised to learn that there is an inquiry in to ambulance service delivery in WA. Having been a recipient of an ambulance myself, I have nothing but praise towards how ambulance is currently run by St John. I know I speak for others who have needed an ambulance that there experience was nothing but positive and life changing. I can't help but feel that this is nothing other than an opportunity to take the heat off the elephant in the room - that being an overwhelmed health system which is under funded. Our ambulance service is fine, and putting it in the hands of government won't change anything except pass the cost on to tax payers.”
