Subject: Changes to Surrogacy Act

To whom this may concern

I write in the hope that you will make changes to the Surrogacy Act and permit single men and gay male couples to be included and have the same rights granted to them as others have.

I hope you will make changes and be a progressive and open minded change for the future that isn't held back by traditional perspectives that continue to oppress marginalized members of our community.

If a society considers and acts positively for the people who are afforded the least rights and held back then we can all move forward and be on the same page.

Thank you for being a part of change.

Kind regards
Jonathan Richards
