Re: Legislative Inquiry into Cockburn Cement - Monster

Dear Ms Linda Omar,

I have been asked to express my views I have about the emissions coming from Cockburn Cement.

We have only been in this house for 3 months and coming from Queensland I must admit we know very little about this company that is concerning so many.

What I do know is that I cannot keep up with all the dust in and out of our home, and for someone who is very house-proud it is extremely frustrating. I find the odours unusual to say the least, but do not know how bad it is for the environment.

My husband takes medication for his asthma, but it is too soon to know whether or not he will be more affected by this dust.

I do think that if by installing this bag-house filter on Kilm 6, it should be done now - not in 2 years time.

Thankyou for taking the time to read this letter.

Yours Sincerely

Mrs. E C Curtis
