

6th December 2021

Standing Committee on Environment and Public Affairs
Legislative Council Committee Office
Parliament House
4 Harvest Terrace,
West Perth. W.A. 6005.

To Hon. Peter Foster MLC, Petition No. 036

You have invited me to provide a written submission.
The submission I am writing is to strongly oppose
Hon. Mark McGowan's proposal to force mandatory
vaccinations on so many livelihoods and threatening
"no job no job". Also threatening huge fines to employers
and employees if they don't comply with this unlawful
draconian law threatening livelihoods and causing
grievous anxieties and fears.

You are taking away people's dignity and self respect
to be able to provide for their families. People
who have important jobs so necessary for our society
to run in an orderly efficient manner.

I have 3 sons, all carpenters trying their hardest
to provide for their families who are now threatened

they will lose their jobs if they don't get vaccinated. No one should ever be forced to have this vaccination or medical treatment they do not consent to.

These are fundamental principles in medicine and should be upheld.

This experimental vaccine does not stop the virus and has actually caused deaths and severe medical reactions to people I personally know after they were vaccinated.

To be forcing school children to have these vaccinations when they already have natural immunity is completely immoral and wrong. also pregnant women, and now talking about children as young as 5 years old.

It is unbelievable that this is taking place right before our eyes.

and it is so shocking how the media and "so-called" health experts are treading on very dangerous grounds promoting this.

I want Mark McCrowan to stop this threat of fining employers and employees if they have strong convictions to protect their God given rights what is injected into their body and refuse mandatory vaccinations.

In closing I strongly recommend the government to promote healthy living, exercise, plenty of fresh air and put a stop to promoting unhealthy food that is causing huge problems with diabetes in children and adults.

And the alcohol advertising during covid has been overkill - these are important issues the government needs to adopt to encourage people to strengthen their immune systems so they won't be affected by this COVID.

Please take this previous petition representing so many businesses and important jobs seriously. The matter is by no means closed.

Sincerely yours,

Amber Pasco

Miss Amber Pasco

Principal Petitioner,
