PETITION IN RELATION TO PROPOSED LANDFILL SITE, YORK

To the President and Members of the Legislative Council of the Parliament of Western Australian Parliament assembled.

We the undersigned residents of Western Australia are opposed to the landfill site proposed by Alkina Holdings Pty Ltd – Great Southern Landfill Part of Lot 4869 on Plan 224502 in Certificate of Title Volume 285, Folio 78A. We are concerned about:

1. the potential for leachate and other pollutants to enter the Mundaring Weir catchment area, National Forest and Parks, environmentally sensitive areas, ground water and river systems;
2. potential contamination to farm land and bio-security areas;
3. the potential for contamination following a seismic event;
4. the transport of waste on the Great Southern Highway (Chidlow/York M010);
5. the transfer of the cost of a contingency plan from one generation to future generations.

Members of SAT never attended the site before giving their decision on the former SITA Allawuna Landfill and the EPA never assessed the former proposal but a "sunset clause" now exists on "Allawuna" farm allowing Alkina Holdings Pty Ltd to proceed with a new application without EPA assessment.

Your petitioners therefore respectfully request the Legislative Council to place a moratorium on the Great Southern Landfill application until the State Government has in place the highest level of environmental protection for our water catchment areas and ground water aquifers. We also request a full inquiry into waste management planning for the whole metropolitan area focusing on minimizing waste and risk management of the location of landfill sites for future generations.
And your petitioners as in duty bound, will ever pray.
