

**I, Brian Christie
promoter this petition which contains 1 signature.**

in the State of Western Australia, am the

To the President and Members of the Legislative Council of the Parliament of Western Australia in Parliament assembled.

We the undersigned residents of Western Australia say “Farmers, other landholders and residents in rural areas of the State are very concerned that the State Government’s recently announced response program to the expected high level of Australian Plague Locust hatchings in 2012 is inadequate and far below that which has been provided in previous years”.

Your petitioners therefore respectfully request the Legislative Council to “approve funds to allow for the State Government to supply, in addition to the announced monitoring assistance program, (1) appropriate levels of approved chemicals, and (2) if the situation arises, aerial spraying.”

And your petitioners as in duty bound, will ever pray.
