To whom it may concern: Regarding Residents House at Mileto, Diannella. W.A.

This letter is to express our displeasure at the thought of Privatising these group homes when the intellect handicapped reside.. Most residents at Meleto St are between the ages of 50 and 70 years and their very elderly parents are in the 70's, 80's and even there 90's

This has made the parent's lives very stressful because the way the house is run and the wonderful staff that work there make the family's lives a whole lot easier and there is no stress involved for the elderly parents. These residents have been house mates together for many years and every one that look's after them does a wonderful job. So Why change things now??

The residents of Melento are very high care people most cannot talk to communicate so having a well know carer and a very familiar face to see every day is very important for them. Major change will only cause the residents to get very stress and anxious .. this is not what we want at all for any of them..

Please re consider you decision...

Regards Ron and Barri Petricevich..
