Hello Lauren,

Thank you for your email. Yes, the 2-page document I sent earlier today is my final submission in support of Petition 016 - Oppose fluoridation chemicals to public water supply in Kununurra.

Compared to the document I withdrew, my final submission includes some changes/additions to make it more complete. I've listed important changes below.

- 808 petitioners corresponds to about 24% of Kununurra's voters
- changed "medication" to "therapeutic goods" and "medicine", which are defined in federal legislation
- added section "Fluoridation does not prevent dental caries". Notes two scientific papers (publication details at end of document). Notes that the WA water fluoridation legislation states nothing about preventing dental caries
- added details to explain why Health WA and Water Corporation might not be authorised to fluoridate Kununurra's water. Fluoride Free WA asked the Minister for two official documents. It also helped me with the petition

Thanks,

Danny Carter
