

Our ref: SPN 063/01

Ms Linda Omar  
Committee Clerk  
Standing Committee on Environment and Public Affairs  
Parliament House  
PERTH WA 6000

Dear Ms Omar

***Petition No. 49 - Moore River Development***

I refer to your letter dated 12 May 2010 regarding the transcript of evidence I gave to the Committee on 5 May 2010.

I have reviewed the transcript and wish to advise that I may have given the Committee incorrect factual information. In particular, I refer to:

- page 7 - after 10.40am, I made an incorrect statement about the Town Planning Regulations 1967. My evidence related to advice received from the State Solicitor's Office that the regulations could be amended to compel local governments to advertise town planning schemes, however such an amendment has not taken place. Following the text "Town Planning Regulations 1967" the evidence would be correct if the text "could be amended to" was inserted.
- page 9 - the planning document referred to is the "Central Coast Regional Strategy"
- page 12 - after 11am, I made an incorrect statement about the location of a future bridge to connect the existing Guilderton townsite with the proposed development south of the Moore River. The area I was talking about is not part of Mr Plunkett's landholding, but the evidence says it is. The text would be correct if, after the text "Also building such a bridge would", the word "not" was inserted.

I have signed and dated the transcript as requested, and I marked one typographical error on page 3. I must also apologise, because I marked the transcript where I made factual errors. I hope this doesn't inconvenience you too much.

If you have any queries regarding this matter, please contact me on 9264 7985 or via e-mail to [cath.meaghan@planning.wa.gov.au](mailto:cath.meaghan@planning.wa.gov.au).

Yours sincerely

Cath Meaghan  
Director Southern Regions

18 May 2010.
