Re Abortion post-20week's duration Petition

The aspects of abortion after 20 weeks gestation that particularly concern the doctors of *Medicine with Morality* relate to babies being born alive then left to die; pain felt by the unborn child during the abortion process; and eugenic considerations.

The doctors of *Medicine with Morality* request to be informed of information coming out of this and any changes to the law that might be proposed.

We would appreciate having an input into any proceedings that might arise.

Dr Lachlan Dunjey MBBS FRACGP DObstRCOG
