MEDIA RELEASE

From: Hon Dr Kim Hames, MLA
Acting Chairman

To: Media

Date: 26 April 2007

INQUIRY INTO THE CAUSE AND EXTENT OF LEAD POLLUTION IN THE ESPERANCE AREA

Next week the Education and Health Standing Committee will be conducting public hearings as part of its Inquiry into the Cause and Extent of Lead Pollution in the Esperance Area. The hearings are open to the public and are being held in Perth on Monday, 30 April 2007 and in Esperance on Wednesday and Thursday, 2 and 3 May 2007. Details are attached.

The Committee invites media representatives to attend the hearings. Please note, however, that because of the size of the Committee Office's hearing room facilities in Perth, media personnel using news cameras and recording equipment are requested to only be in attendance for the first 15 minutes from the commencement of proceedings at 10:15 am. The restriction does not apply to the hearings in Esperance as these will take place in the Auditorium at the Civic Centre.

As indicated in the attachment, representatives of Magellan Metals Pty Ltd and the Esperance Port Authority will be appearing as witnesses at the Esperance hearings. Other potential witnesses will be contacted shortly, based on the submissions received from Esperance-based individuals and agencies before the deadline tonight. These witnesses will be listed on the Committee's website as soon as details and availability have been confirmed.

The public hearings in Perth and Esperance will be conducted in accordance with standard Committee procedures. That is, all witnesses to give evidence will be notified in advance and, other than those representatives listed in the attachment, will be invited to speak to their written submissions.

Other members of the public are invited to observe the hearings but should be aware that these are not public meetings and they will not have the opportunity to express their views at these forums. However, the Committee encourages interested individuals and agencies to consider providing written submissions, including responses to the evidence given at public hearings and supplementary submissions, and is expected to announce an extension of the deadline shortly.
